CONNECTED CAPITAL / AN ECOSYSTEM BRIEFING

Raise capital. Build the route to market.

One company journey across Hybrid Banking, the Launchpad and Hybrid Exchange.

01 / THE COMPANY LIFECYCLE

One offering.
More than a launch.

01

Prepare & assess

Define rights, accountable representation and exact evidence.

02

Raise & allocate

Review agreements, reconcile funds and record ownership.

03

Seek a market

Separate admission, restricted transfers and liquidity.

04

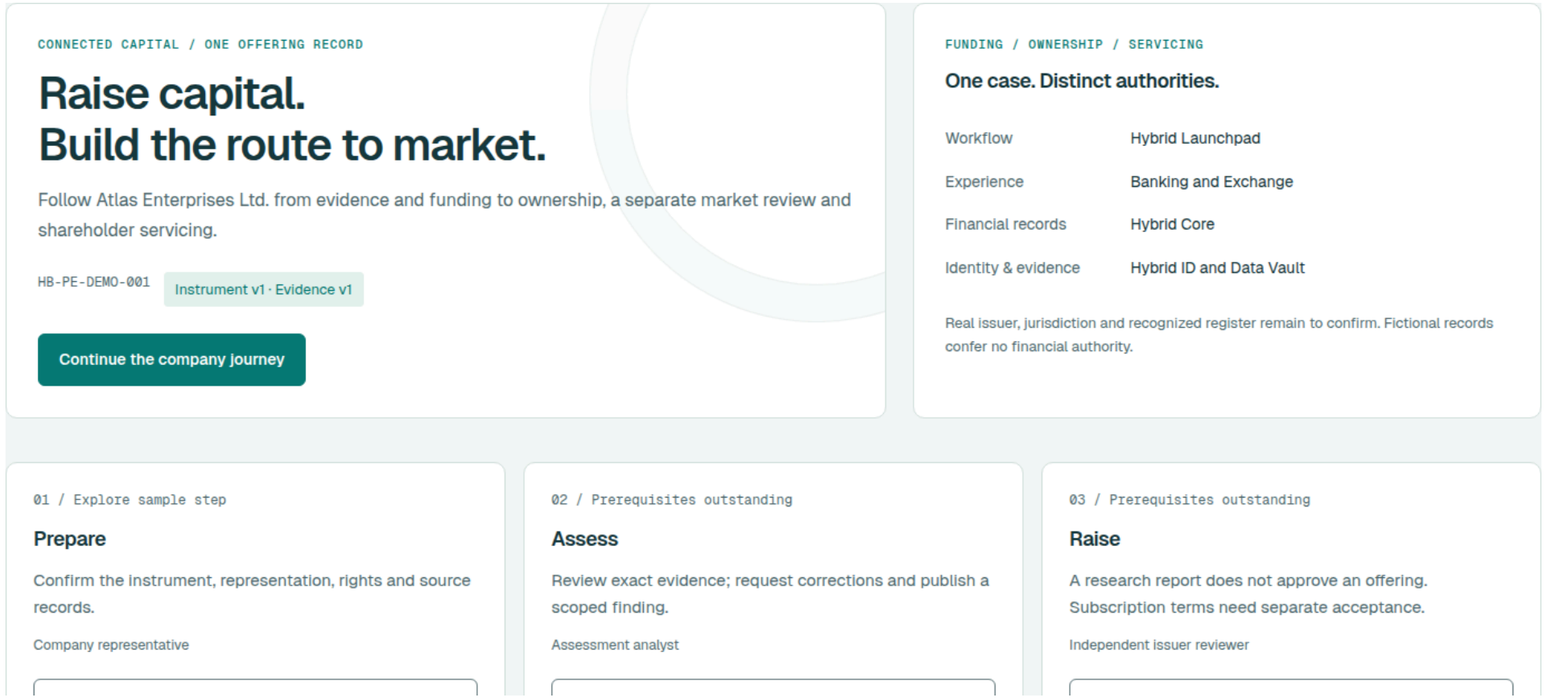

Service & reassess

Distributions, voting, corporate actions and material changes.

02 / ACTUAL SIMULATOR EXCERPT

A company workspace with a next step.

Follow the existing offering; do not restart onboarding at every handoff.

ACTUAL BROWSER DEMONSTRATION / FICTIONAL RECORDS / CROPPED EXCERPT

One reference

Instrument and evidence versions travel with the case.

Explicit responsibility

See who acts next and what remains outstanding.

03 / INSTRUMENT DEFINITION

Start with what the investor actually owns.

RIGHTS

Define the legal interest.

Direct shares, SPV equity and custody claims are different structures. Confirm the issuer, jurisdiction, class rights and recognized register.

ACCESS

Define who may hold it.

Investor criteria, representation, transfer windows and current disclosure precede a subscription or transfer. Identity alone is not legal title.

04 / DILIGENCE AND REVIEW

Research informs. The decision remains accountable.

01

Collect

Purpose-bound access to exact source versions in Data Vault.

02

Assess

Findings identify sources, uncertainty, methodology and expiry.

03

Respond

The company corrects evidence; successor versions trigger review.

04

Decide

An authorized reviewer accepts exact offering terms separately.

> StatForce is a proposed assessment connection. Its methodology, contract and resources remain to agree.

05 / PRIMARY FUNDING

Follow the subscription funds.

01

Accept terms

Bind the investor agreement to the exact offering version.

02

Reconcile funding

Match the original receipt, currency, wallet or bank-account route.

03

Allocate

Check capacity and the controlling ownership register.

04

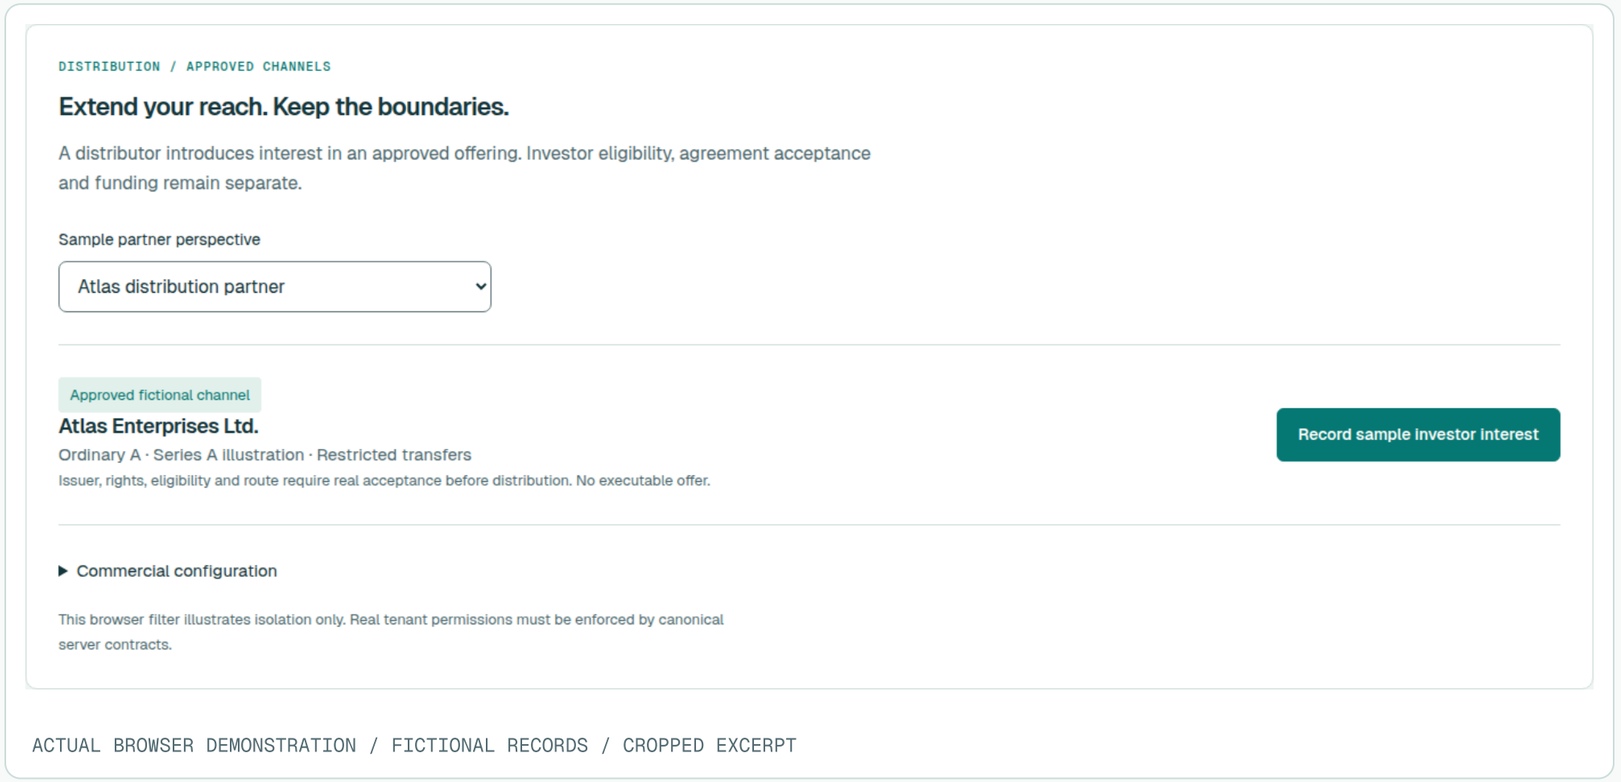

Return / service

Refund unallocated funds; retain a clear servicing record.

> Fiat and stablecoin routes are alternatives subject to provider support. FX, fees and receipts are separate operations. No automatic investment of subscription funds.

06 / DISTRIBUTION

Partner reach without losing the boundaries.

ACTUAL BROWSER DEMONSTRATION / FICTIONAL RECORDS / CROPPED EXCERPT

Approved offering access

A channel sees only its permitted offering in this illustration.

Interest is not investment

Eligibility, agreement and funding still follow separately.

07 / MARKET STRUCTURE

Select a suitable route to market.

PRIVATE MARKET

Controlled OTC / RFQ

Restricted interests may suit negotiated counterparties and scoped indications. Quotes, transfers and settlement need their own authority.

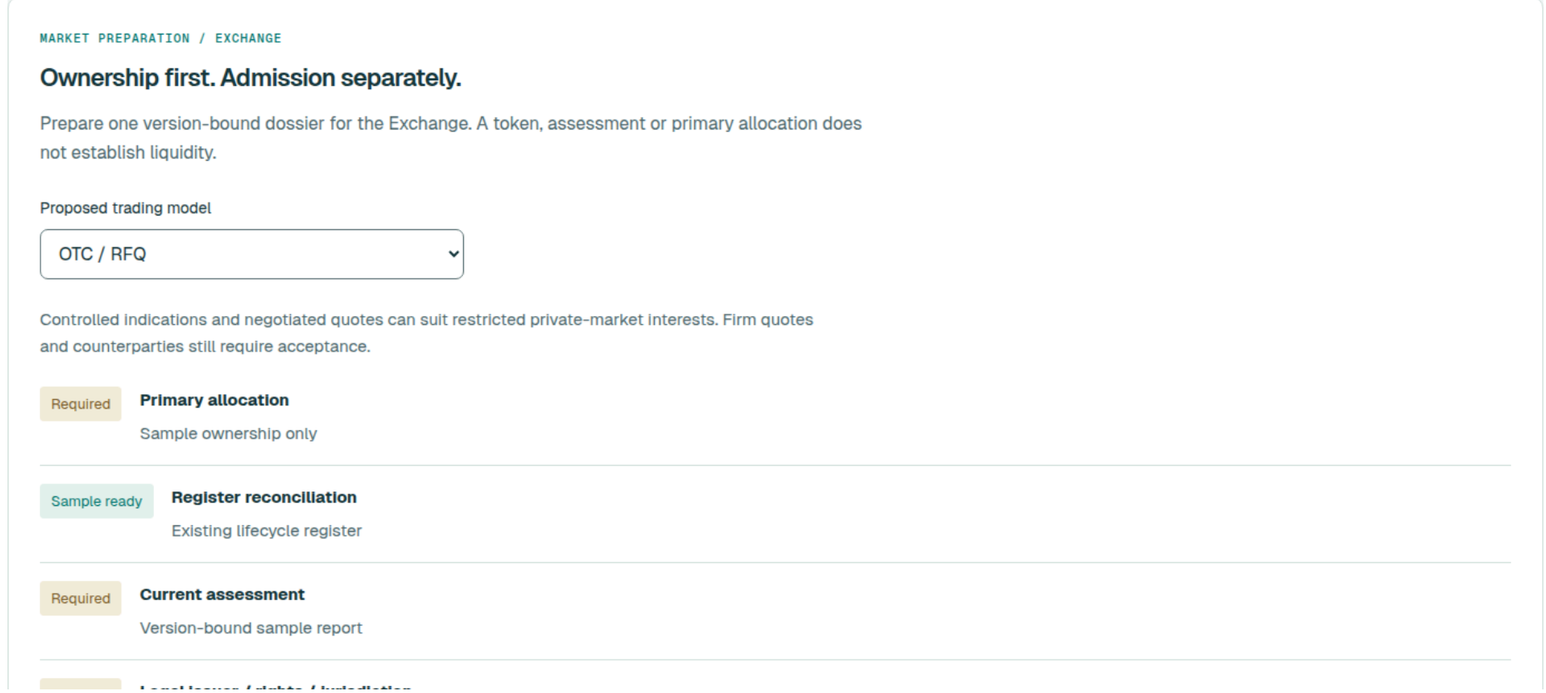

ORDER BOOK

Separate market admission

Trading needs approved instruments, eligible participants, funded liquidity, surveillance and accepted settlement. Tokenization alone supplies none of these.

08 / EXCHANGE HANDOFF

Prepare the dossier. Verify before admission.

ACTUAL BROWSER DEMONSTRATION / FICTIONAL RECORDS / CROPPED EXCERPT

Version-bound preparation

Carry the same case, instrument, rights and evidence references.

Acceptance is separate

Legal inputs, financial receipts and venue readiness remain required.

09 / ECOSYSTEM ARCHITECTURE

One experience. Distinct service owners.

RESPONSIBILITY	WHAT IT PROVIDES
Banking / Launchpad	Customer experience / governed primary-offering workflow.
Hybrid ID / Data Vault	Current identity and representation / controlled exact-version evidence.
Hybrid Core / Chain	Authoritative balances, holdings, financial records and receipts.
Hybrid Exchange	Separate admission, liquidity, Rust execution and settlement validation.
Explorer / providers	Appropriate proof inspection / individually commissioned service routes.

10 / SERVICING AND ECONOMICS

Value continues after the raise.

01

Ownership

Reconcile holdings and permitted transfers without duplicate registers.

02

Servicing

Distributions, votes and corporate actions use exact snapshots.

03

Ongoing evidence

Material changes can trigger new assessment and restrictions.

04

Service revenue

Agree platform, distribution, execution and servicing fees separately.

Interest, allocations, trading volume, custody balances and AUM are different measures. No growth forecast or fee agreement is implied.

NEXT / DEMONSTRATE, COMMISSION, ACCEPT

Start with one accepted Testnet case.

The demo is available now. Genuine issuer authority, evidence access, Core financial receipts and Exchange readiness must be accepted before connected execution.

Explore the resettable demo

Discuss a pilot

> One issuer. One instrument. One funding asset. Independent review. Failure, retry and reconciliation acceptance before expansion.
