PARTNER DISTRIBUTION / IMPLEMENTATION BRIEFING

Your network. A connected capital offering.

Bring approved offerings to eligible customers through a controlled, branded experience.

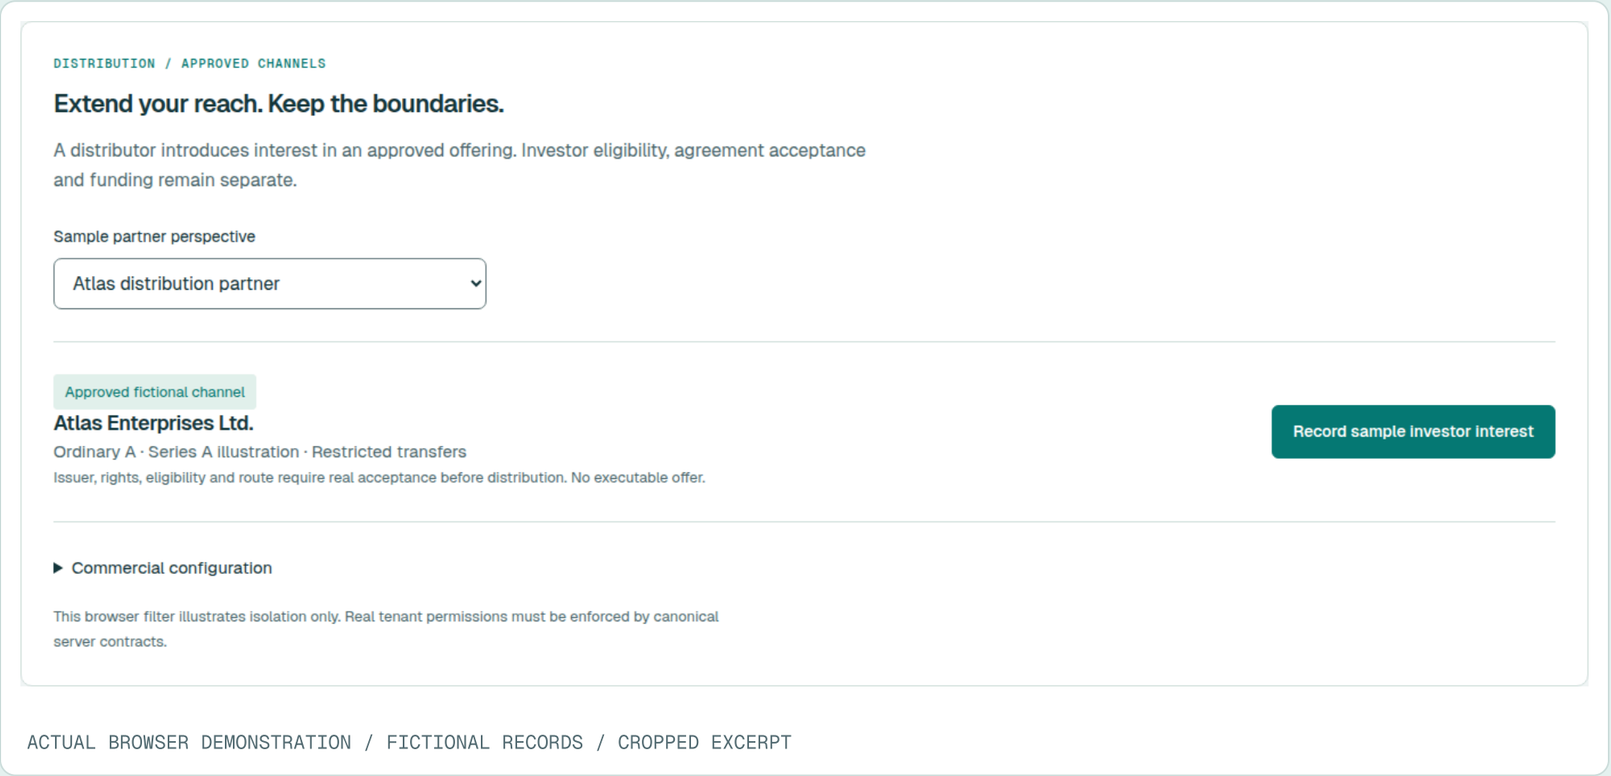

01 / OPERATING MODEL

Define the responsibilities before the connector.

RESPONSIBILITY	WHAT IT PROVIDES
Issuer / originator	Instrument rights, company records, disclosures and ongoing obligations.
Distributor / broker	Agreed customer relationship, permitted promotion, eligibility and attribution.
Assessment provider	Scoped findings with source/version binding; not blanket issuer clearance.
Venue / liquidity providers	Separate admission, trading model, quotes and execution responsibilities.
Core / service providers	Canonical financial records and accepted funding/settlement routes.

02 / ACTUAL SIMULATOR EXCERPT

A partner workspace with scoped access.

ACTUAL BROWSER DEMONSTRATION / FICTIONAL RECORDS / CROPPED EXCERPT

Tenant boundary

The second sample partner has no Atlas offering grant.

Original reference

Repeated interest clicks retain the same version-bound reference.

03 / CUSTOMER JOURNEY

From introduction to an accepted subscription.

01

Discover

Show approved instrument rights, status and source disclosures.

02

Qualify

Check actual customer and product eligibility under current authority.

03

Agree

Review exact terms, fees and consent; record a nonbinding referral separately.

04

Fund

Use the accepted route; Core reconciles before allocation.

04 / INTEGRATION ARCHITECTURE

Integrate once. Preserve canonical authority.

INTERFACE

Banking and partner experience

Branding, task guidance, customer status and service orchestration. No browser-supplied ownership or email-based permissions.

SERVICES

Existing bounded contracts

Launchpad workflow; ID authority; Vault evidence; Core financial receipts; separate Exchange admission and Rust execution. Exact routes require commissioning.

05 / COMMERCIAL MODEL

Commercial building blocks, agreed explicitly.

01

Implementation

Scope, deliverables, acceptance and change control.

02

Platform

Service level, included modules and support responsibilities.

03

Transactions

Define trade basis, sides, provider costs and refunds.

04

Servicing / shares

Agree recipients, attribution, timing and reconciliation.

> No price, percentage, minimum, licence inclusion or partner commitment is offered by this deck. Private commercial assumptions remain private.

06 / ACTIVATION GATES

Commission and test the complete journey.

RESPONSIBILITY	WHAT IT PROVIDES
Actual offering	Issuer, jurisdiction, rights/register, investor criteria and supported asset.
Current authority	Company/reviewer delegation, explicit consent and exact Vault access.
Financial acceptance	Original funding, allocation, refund and servicing receipts; retries and reconciliation.
Market acceptance	If requested: separate venue admission, liquidity and settlement.
Operations	Isolation, revocation, outages, incident handling and stop-new-risk controls.

NEXT / EXPLORE TOGETHER

Start with a reviewable partner pilot.

Use the resettable illustration to agree the customer journey, responsibilities and evidence. Connect actual Testnet services only after joined acceptance.
